DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I in Paper No. 8 is acknowledged. The traversal is on the ground(s) that all the groups would appear to be no serious burden to examine, based on the classification provided by the examiner. This is not found persuasive because although it may appear that the classification is similar in number, the difference is substantial and accordingly the restriction was made.

Group II has been rejoined with Group I because of the amendments of February 15, 2002

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, 16-49 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Funkenbusch et al. (Funkenbusch), U.S. Patent 5,271,833.

Funkenbusch discloses the chromatography column as claimed using the carbon having organic group attached thereto (see abstract). The reference further discloses similar type of organics claimed (see columns 9-19).

Art Unit: 1741

Therefore, the claims are rejected.
